

LOCKED-IN

GCash TeamLine

Controlled purchasing today.
A credit record tomorrow.

ONE LINE
FOR
THREE
WORKERS

Every morning starts with cash. Every night ends with guesswork.

Urban small contractor | 3 workers | daily material runs | paid through progress billing

06:30

MORNING

Cash leaves his hands

He advances physical cash before workers leave for suppliers.

11:00

MATERIAL RUN

Control disappears

Once cash is handed over, limits and merchant rules no longer exist.

19:00

AT NIGHT

Receipts become detective work

Crumpled slips and memory decide what gets recorded.

The deeper problem: he fronts materials for weeks, while cash spending builds no usable credit record.

TeamLine solves control and cash flow together.

One controlled purchase creates immediate oversight - and the data needed for future credit.

01 Control every purchase

The owner delegates a capped allowance. Workers pay supplier QRs without receiving cash.

PER-WORKER CAPS
SUPPLIER + CATEGORY RULES
INSTANT FREEZE

02 Finance the project gap

The business line pays for materials now. Tagged spend and repayment create a visible credit file.

A BIGGER LINE OVER TIME

ONE BUSINESS CREDIT LINE | THREE AUTHORIZED WORKERS | ZERO CASH HANDOFFS

GCash TeamLine splits one business credit line into controlled worker allowances.

PHASE 1: registered merchant QRs | PHASE 2: help personal-QR neighborhood stores become GCash merchants
